

2) find the profit percentage by using selling and cost price.

$$P = C.P. - S.P.$$

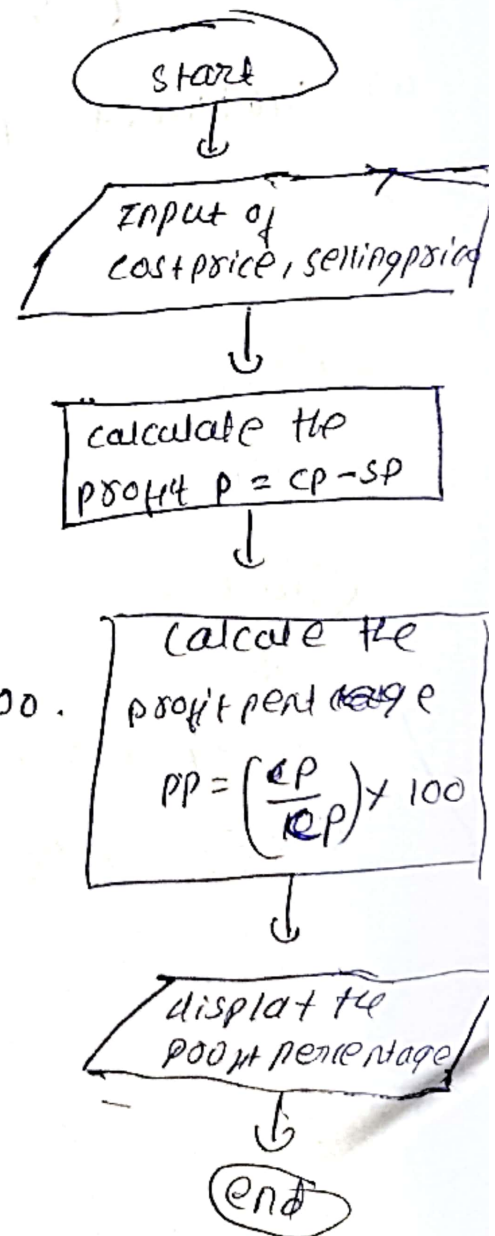

- 1) input $\rightarrow$ SP, CP
- 2) process $\rightarrow$ profit = SP - CP
profit percentage = $\left(\frac{\text{profit}}{\text{CP}} \right) \times 100$
- 3) output $\rightarrow$ profit percentage

Algorithm

- 1) start
- 2) The ~~is~~ ~~are~~ take input of cost price and selling price
- 3) calculate the profit by SP - CP
- 4) calculate the profit percentage using this formula

$$\text{profit percentage} = \left(\frac{\text{profit}}{\text{CP}} \right) \times 100.$$

- 5) display the profit percentage.

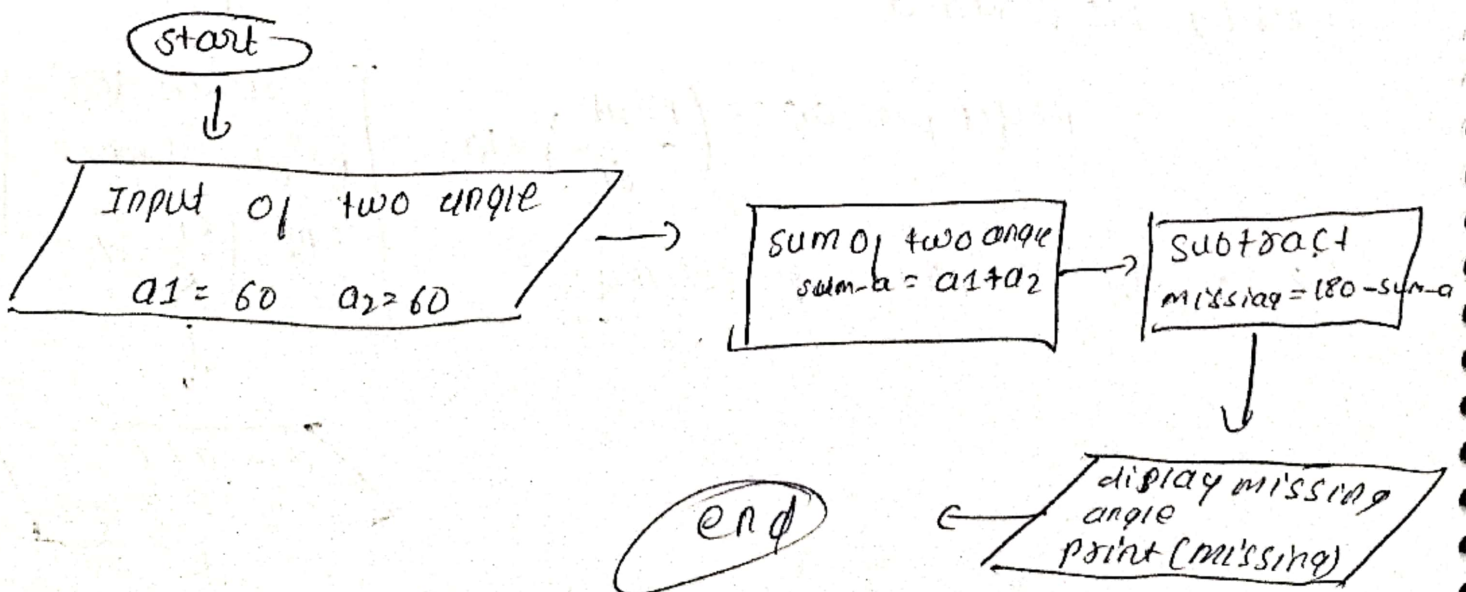

find the missing angle triangle by taking
2 angles $\frac{1}{2} \times w \times h$

Algorithm

- 1) start
- 2) Take the input of 2 angles
- 3) subtract the ^{sum 2} 2 angles from 180.
- 3) sum of given 2 angles
- 4) subtract from the ~~180~~ 2 angles from 180°
- 5) display the missing angle
- 6) end;

algorithm

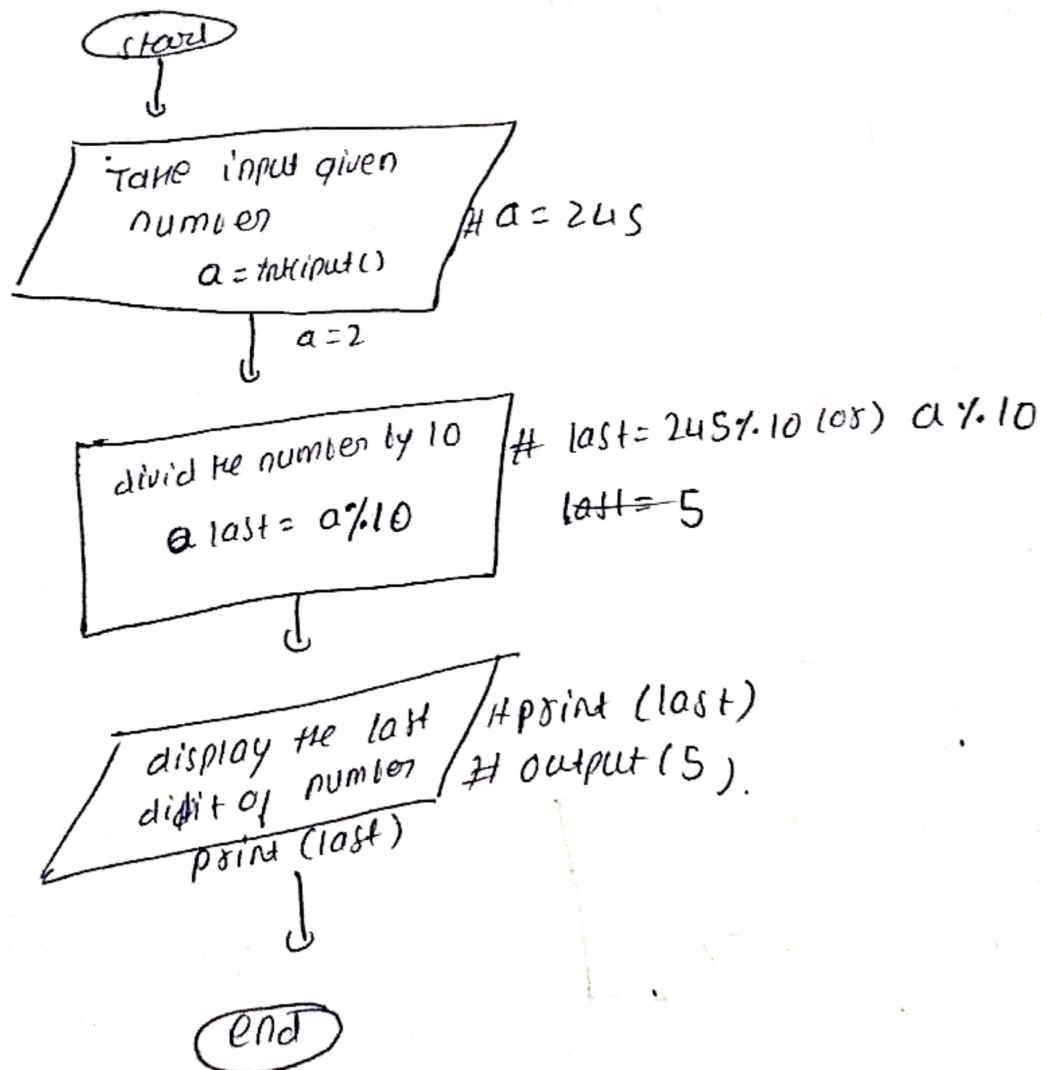

Q Find the last digit of given number.

algorithm

- 1) start
- 2) Take input of give number.
- 3) moduls.
i.e divide the give number by 10
- 4) display the output last digit of give number

Flow chart

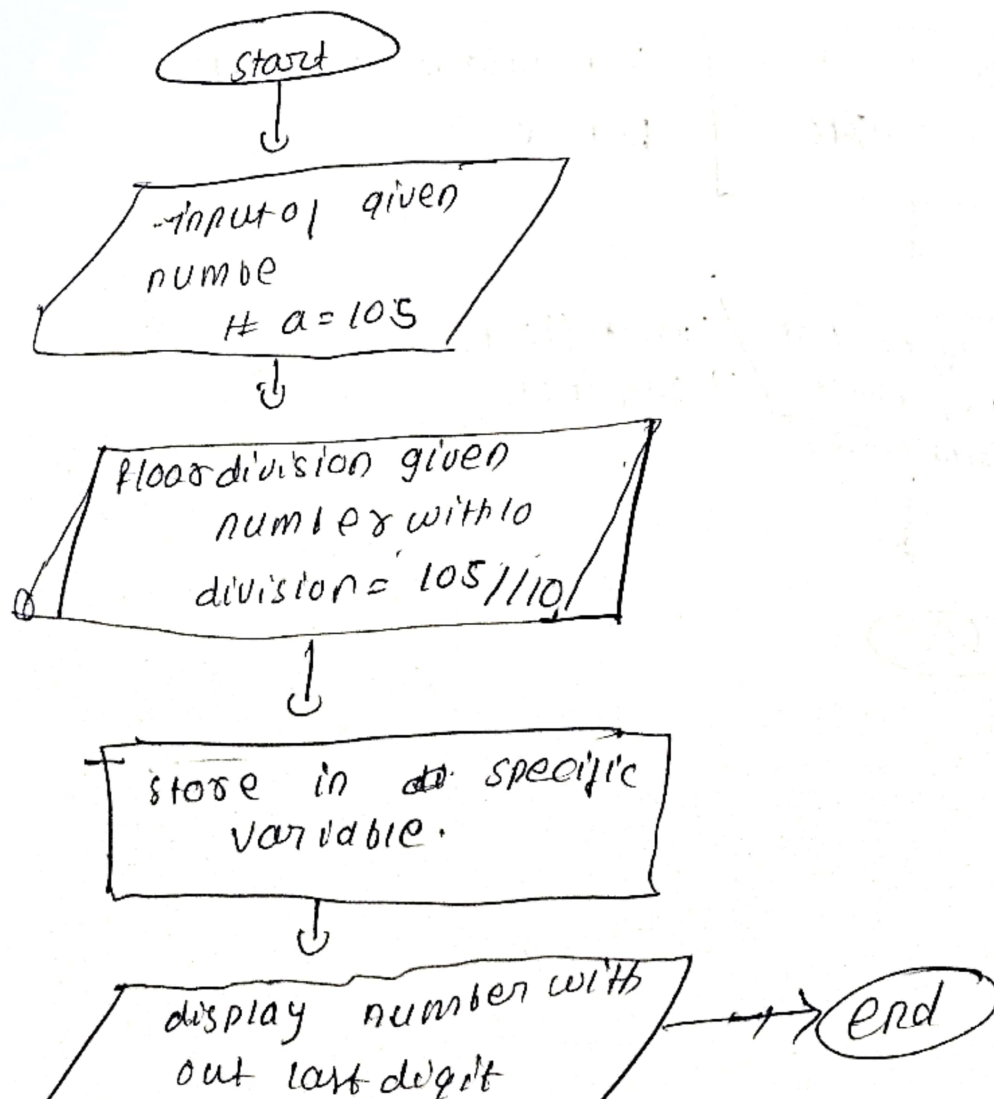

5) remove last digit from given number

algorithm

- 1) start
- 2) Take input of given number
- 3) ^{floor}dividing the number by 10
- 4) display the ~~remaind~~ ^{and} last digit
- 4) display the number without last digit of given number.

flow chart

- 1) find the first digit of 4 digit number.
- 2) find the sum of first n natural numbers.
- 3) find the Avg of first n natural numbers.

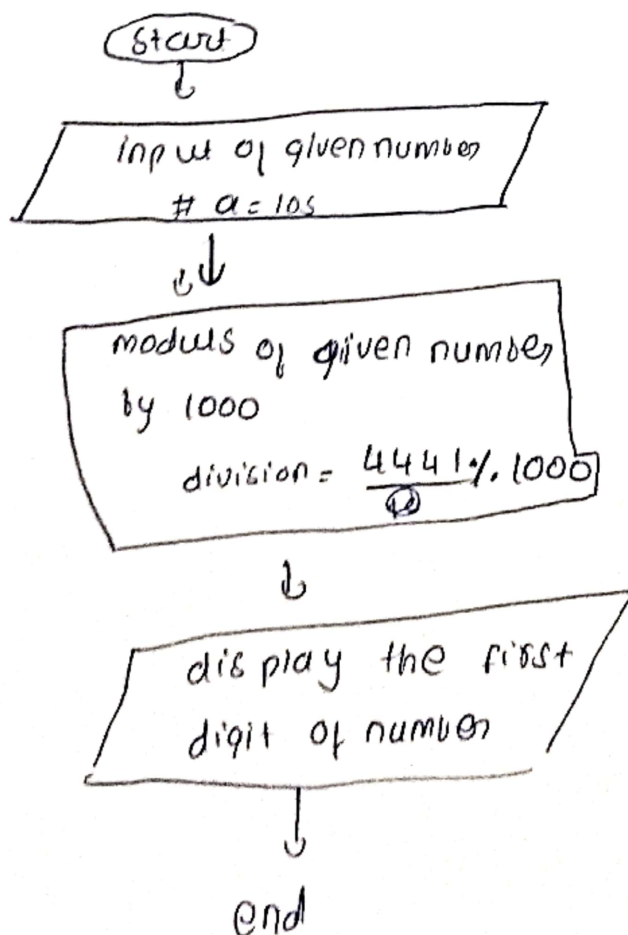

1) find the first digit of 4 digit number

A)

Algorithm

1. start
2. Take input of given number.
3. modulus of given number by 1000
4. display the number first digit.

flow chart

code:

```
n1 = int(input('enter a number: '))
```

```
modulus = n1 % 1000
```

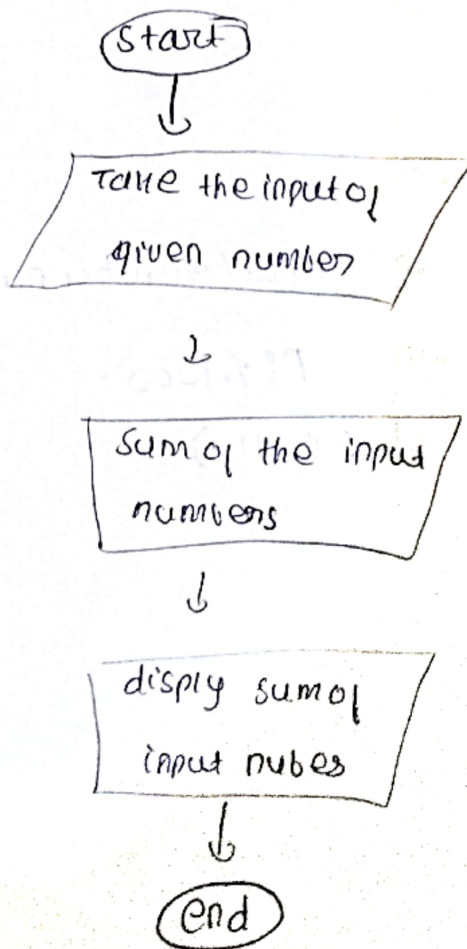

```
print(modulus)
```

Find the sum of nth natural number.

1) Algorithm

- 1) start
- 2) Take the input of given numbers
- 3) ~~sum of the~~ use the loop until
- 3) sum of the given numbers.
- 4) display the sum of the number.

Flow chart

find the Avg of nth natural numbers

1) Algorithm

1) start

2) Take the input of given numbers.

3) sum of the given numbers.

4) sum of the given numbers by n th natural numbers

5) display the Avg of given natural numbers.

Flow chart
