

check the given number is positive or negative or equal to zero

n = int(input("enter a number"))

if n > 0:

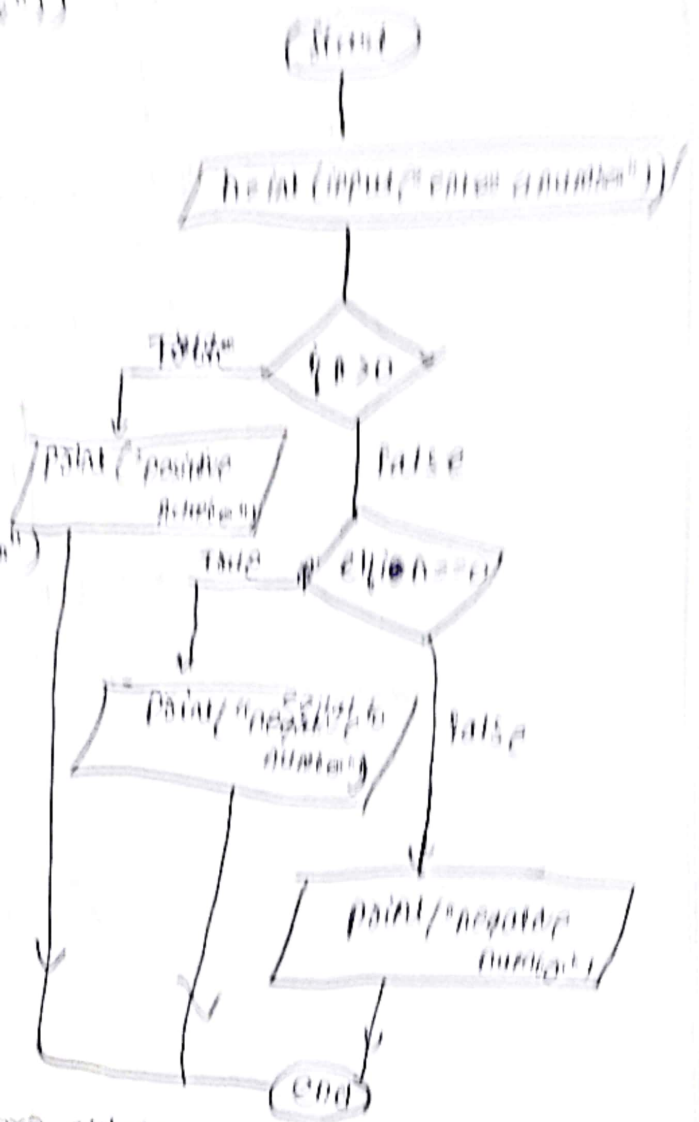

print("positive number")

elif n == 0:

print("equal to zero")

else:

print("negative number")

check given value is number (or) alphabet (or) symbol

n = int(input("enter a value: "))

if n >="A" and n <="Z" (or) n >="a" and n <="z":

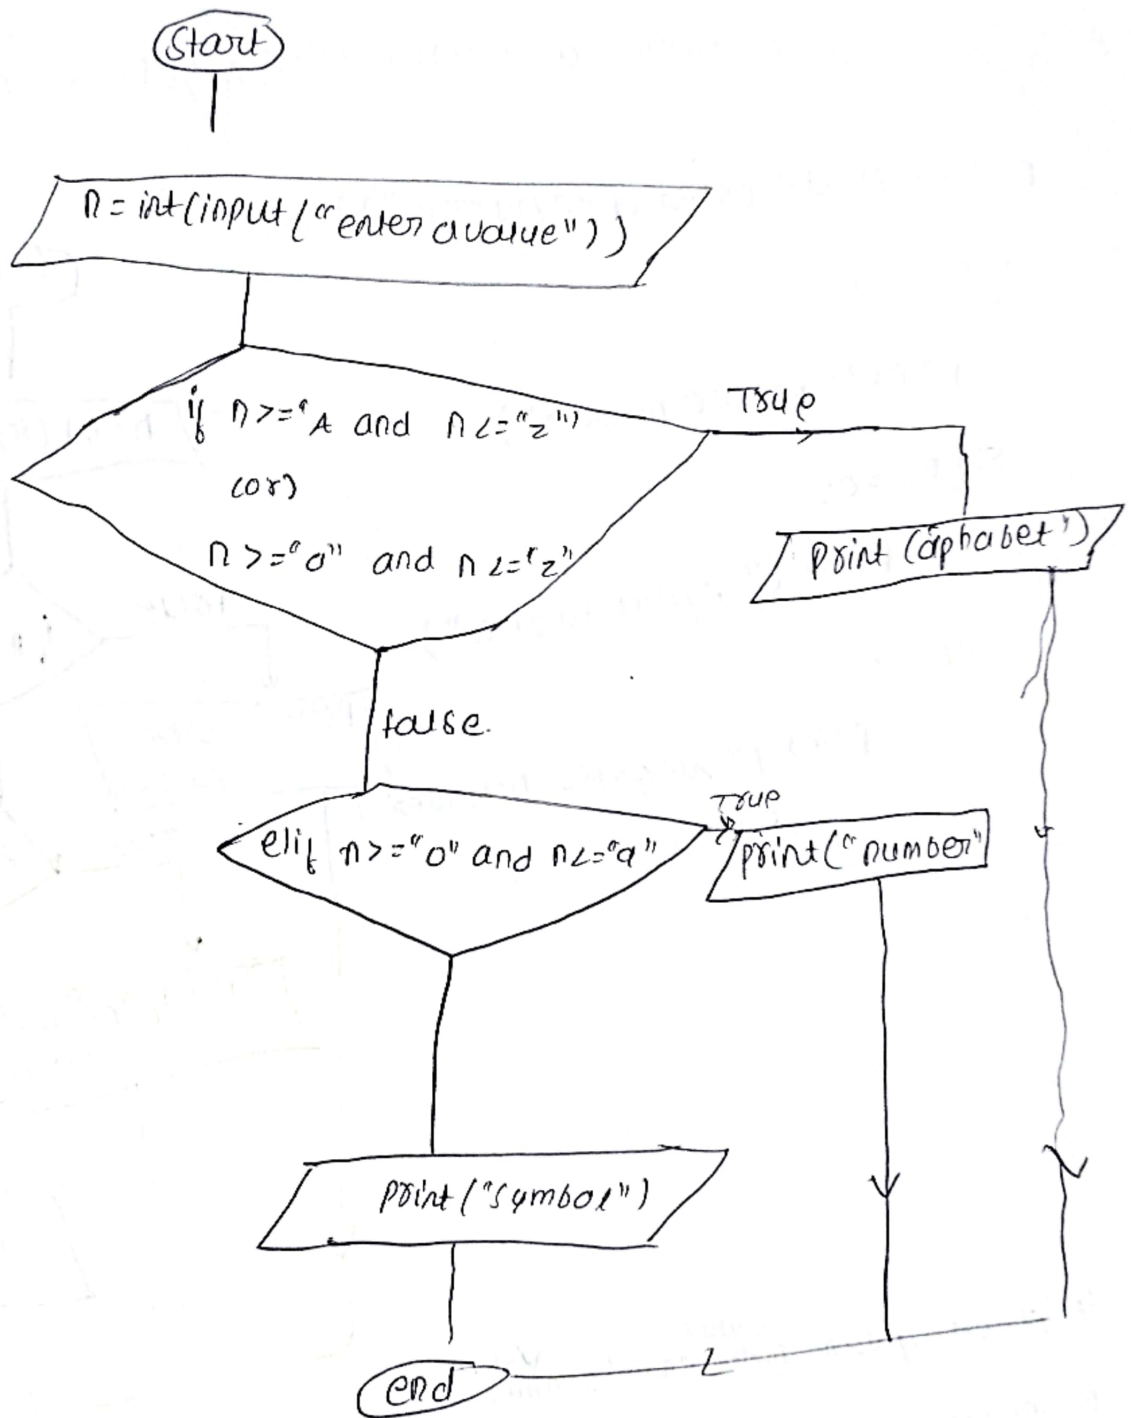

print("alphabet")

elif n >="0" and n <="9":

print("number")

else:

print("symbol")

display the grades based on the marks

above 90: 'O'

91 to 90: 'A'

50 to 70: 'B'

35 to 50: 'C'

below 35: fail

```
n = int(input("enter the number: "))
```

```
if n >= 90:
```

```
    print("O")
```

```
elif n >= 70 and n <= 90:
```

```
    print("A")
```

```
elif n >= 50 and n <= 70:
```

```
    print("B")
```

```
elif n >= 35:
```

```
    print("C")
```

```
else:
```

```
    print("Fail")
```

check give number is odd or even if it is positive

```
n = int(input("enter the number: "))
```

```
if n != 0:
```

```
    if n % 2 == 0:
```

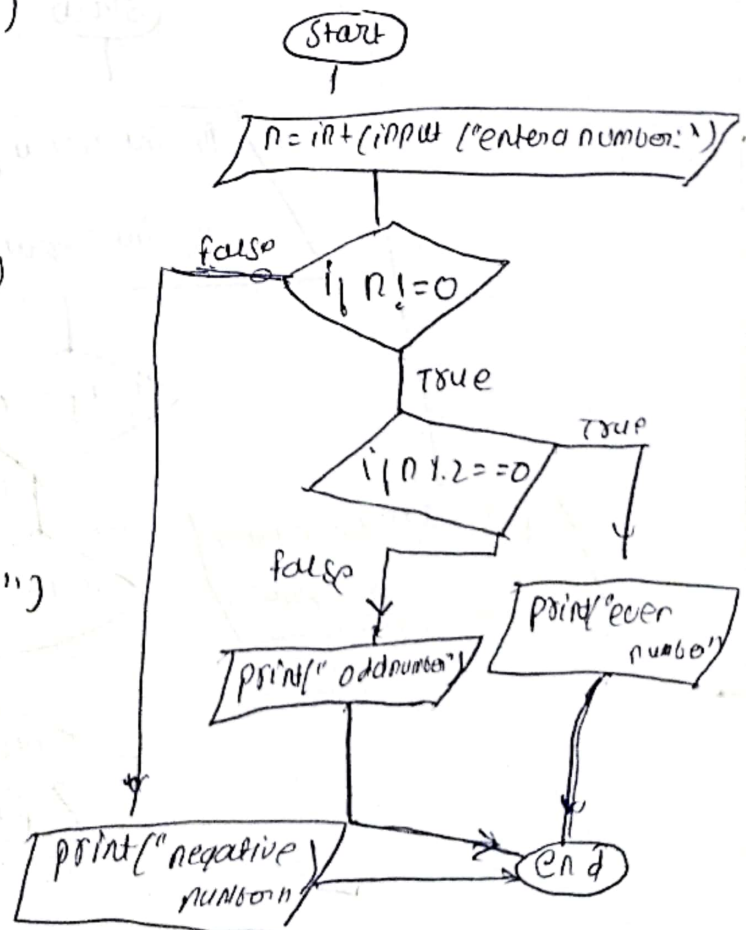

```
        print("even number")
```

```
    else:
```

```
        print("odd number")
```

```
else:
```

```
    print("negative number")
```

display the smallest number from the give two values
only they are not equal.

```
n1 = int(input("enter a number"))
```

```
n2 = int(input("enter a number"))
```

```
if n1 != n2:
```

```
    if n1 > n2:
```

```
        print("smallest value among two is", n2)
```

```
    else:
```

```
        print("smallest value among two is", n1)
```

```
else:
```

```
    print("smallest value among two is equal")
```
